Education

- Bachelor of Engineering in Information Science and Engineering | **VTU** 2021 - 2025
Cambridge Institute of Technology, Bengaluru
CGPA: **8.8**
- Pre-University in Computer Science | **KREIS** 2019 - 2021
MDR PU College of Science Deodurga, Raichur
Percentage: **88.3%**

Internship Experience

- Orants AI** | AI Engineer October 2025 - January 2025
 - Worked on cutting-edge AI projects including influencer tracking, content generation, and intelligent application development, AI automation(n8n), and AI Models.
- Capgemini, NASSCOM Foundation** | Data Science September 2024 - March 2025
 - Applied data visualization, machine learning, and artificial intelligence techniques.
 - Acquired skills in data preprocessing, model development, and deployment.
- Samsung Innovation Campus** | Internet of Things August 2023 - February 2024
 - Computer Networks, Operating System.
 - Gained hands-on experience in IoT, focusing on Raspberry Pi and Python-based automation.

Projects

- Vaidehi** - Advance Journaling Web App | Next.js, React, PostgreSQL | [Link](#) | [Github](#) November 2025 - March 2026
 - Developed an advanced journaling web application integrating To-Do management, daily routines, and trading journals.
 - Implemented advanced metrics and analytics to track productivity, habits, and trading performance.
 - Built a scalable backend using Supabase with PostgreSQL for secure data storage and real-time updates.
- AI Forecast for Investor Decision** | Python, Django, LSTM, CNN | [Github](#) November 2024 - March 2025
 - Developed an AI-driven stock price prediction model using LSTM for long-term trend forecasting and CNN for short-term pattern recognition.
- E-Commerce Website** | DBMS, Fullstack | [Github](#) January 2023 - April 2023
 - Utilized MySQL for database management and enhanced UI/UX using HTML, CSS, and JavaScript and Leveraged GitHub for version control and collaborative project management.
 - Implemented Django's MVT architecture for structured development and maintainable code.

Skills

Programming: Java, Python, C#
Web Development & Databases: .NET, Django, HTML, CSS, Next.js, JavaScript, MySQL, MongoDB, Supabase, Firebase
Developer Tools: GitHub, JIRA, VS Code, PyCharm, Eclipse, Google Colab, n8n, Odoo, MS Word, Excel
Core Competencies: OOPs, DBMS, Data Science, Data Structure, Operating System, Machine Learning, AI Automation
Soft Skills: Teamwork, time management, adaptability, and communication

Certifications

- Data Science & Machine Learning: FutureSkills Prime (Data Science and ML).
- Employability Skills – JobReady: Wadhwani Foundation.
- Software Development: SpringBoard (RDBMS and MySQL), Atlassian (Scrum Project Management).
