Education

- Bachelor of Engineering in Information Science and Engineering | **VTU** 2021 - 2025
  Cambridge Institute of Technology, Bengaluru | CGPA: **8.8**
- Pre-University in Computer Science | **KREIS** 2019 - 2021
  MDR PU College of Science Deodurga, Raichur | Percentage: **88.3%**

Work Experience

TCS | Associate System Engineer April 2026 - Present

- Completed Intensive training in Mendix low-code development, gaining hands-on experience in application development, page design, domain modeling, security configuration, microflows, API, and Object Query Language (OQL).
- Applied Mendix development concepts to build and configure application components, implement business logic through microflows, and establish application security, strengthening practical skills in end-to-end application development.

Orants AI | AI Engineer October 2025 - January 2026

- Worked on cutting-edge AI projects including influencer tracking, content generation, and intelligent application development, AI automation(n8n), and worked on AI Models training.

Capgemini, NASSCOM Foundation | Data Science September 2024 - March 2025

- Applied data visualization, machine learning, and artificial intelligence techniques.
- Acquired skills in data preprocessing, model development, and deployment.

Samsung Innovation Campus | Internet of Things August 2023 - February 2024

- Computer Networks, Operating System(Linux, Windows, Android).
- Gained hands-on experience in IoT, focusing on Raspberry Pi and Python-based automation.

Projects

Vaidehi - Advance Journaling Web App | Next.js, React, PostgreSQL | Link | Github November 2025 - March 2026

- Developed an advanced journaling web application integrating To-Do management, daily routines, and trading journals. Advanced metrics and analytics to track productivity, habits, and trading performance.
- Built a scalable backend using Supabase with PostgreSQL for secure data storage and real-time updates.

AI Forecast for Investor Decision | Python, Django, LSTM, CNN | Github November 2024 - March 2025

- Developed an AI-driven stock price prediction model using LSTM for long-term trend forecasting and CNN for short-term pattern recognition.

E-Commerce Website | DBMS, Fullstack | Github January 2023 - April 2023

- Utilized MySQL for database management and enhanced UI/UX using HTML, CSS, and JavaScript and Leveraged GitHub for version control and collaborative project management.
- Implemented Django's MVT architecture for structured development and maintainable code.

Skills

Programming: Java, Python, C#

Web Development & Databases: .NET, Django, HTML, CSS, Next.js, JavaScript, MySQL, MongoDB, Supabase, Firebase

Developer Tools: Medix Studio Pro, Team Server, Git, GitHub, JIRA, VS Code, Eclipse, GColab, n8n, Odoo, MS Office

Core Competencies: OOPs, RDBMS, Data Science, Data Structure, Operating System, Machine Learning, AI Automation

Certifications

- Mendix Academy Developer Certifications - Rapid developer and Intermediate developer certificate
- Data Science & Machine Learning: FutureSkills Prime (Data Science and ML).
- Employability Skills – JobReady: Wadhwani Foundation.
- Software Development: SpringBoard (RDBMS and MySQL), Atlassian (Scrum Project Management).
